	/Quyen Leung/ SPE, Art Unit 2834		

Continuation of 11. does NOT place the application in condition for allowance because: Applicant's arguments regarding Claims 1 and 10 are not persuasive.

Regarding the 35 USC 112, second paragraph rejection is deemed proper since the elements (radial web, fan blade, metallic insert) are MOLDED together. It is not clear how the "metallic insert is disposed separate and apart from the fan blade" if they are molded together. Elements which are molded together are a single integral unit. There would have to be some kind of spatial gap / void/ space between the elements (which is not claimed) in order for them to be disposed separate and apart from each other. As noted by aplicant that the definition of "apart" means that something would have to be "disunited", then it is still not clear how elements which are molded together can be "disunited". Molded elements touch and / or adjoin each other.

Regarding applicant's arguments for claims 1 and 10, Vasilescu teaches the use of a fan made of plastic (abstract lines 4-5). The fan includes the blades (abstract line 3). At least part of the fan blades are made of plastic (Col 8 II 5-6 and abstract) or the blades can be made entirely of plastic (Col 2 II 30-32, 38-40). Fig 10.67 shows the fan structure having a web onto which the blades are attached.

Regarding applicant's arguments that Abadia does not teach the use of a plastic web or a metallic insert are not persuasive. These limitations have been addressed by Vasilescu. Abadia clearly teaches the use of a sensors in different locations.

Applicant's arguments for claims 7 and 9, are not persuasive. Abadia clearly teaches that the target is magnetic (abstract line 3). Lopatinsky teaches the use of molding plastic with other elements.

Applicant's arguments for claim 13 are not persuasive. Examiner reminds applicant that the "powder pot" is made of epoxy resin (as noted in applicant's specification). Gold teaches the use of epoxy resin. It is well known in the art to use resin to attach wires.
